Educational Trip to Science City and Isckon Temple in Siliguri

Collaboration programme with Rotary Club of Biratnagar Downtown on International Day of Person with Disabilities

Are we ready for tomorrow ?

For centuries, we've stuck to the same old ways of learning, following traditions that have been around forever. But the world has changed a lot, with technology and society evolving rapidly. Surprisingly, education methods have often stayed the same. In today's digital age, we need to connect the wisdom of the past with the needs of the present. This reflection urges us to think about the change's education needs to make for the future. The question that arises is whether our current educational systems are adequately preparing our children for the unpredictable and dynamic future that awaits them.

As we stand at the crossroads of the digital age, it is crucial to assess whether the education system is evolving in tandem with the rapid changes in society. The traditional classroom model, with its emphasis on rote memorization and standardized testing, may no longer be sufficient in equipping students with the skills needed for the diverse challenges of the modern world.

The digital implementation in the classroom involves the incorporation of technology to enhance the learning experience. While these tools

hold the potential to revolutionize education, their effectiveness depends on how well they are integrated into the curriculum. A notable example of this forward-thinking approach is observed at Sri Sri Ravishankar Vidya Mandir School in Biratnagar, where a collaboration with Digi School is shaping a curriculum designed to prepare children for the challenges ahead. Digi School's innovative approach places emphasis on future-oriented skillsets such as digital literacy, coding, online safety, and computational thinking, providing our children with a well-rounded foundation for the rapidly evolving landscape they'll encounter.

Life beyond the classroom is seldom uniform. The future jobs and challenges our children will encounter demand skills beyond traditional academic knowledge. Analytical thinking, collaboration, and adaptability to new technologies are increasingly essential in a world shaped by automation and artificial intelligence. To ensure our children are equipped for this future, a vital focus on digital literacy is necessary. This ensures they not only navigate but thrive in a world where innovation, ethos and creativity are the keys to success.

Word of the day

Dismal (adjective)

Meaning: causing a mood of gloom or sadness
The dismal mood of the leader made everyone sad.

Synonyms: Gloomy, Mournful

Antonyms: cheerful, joyful

War's Impact on Society

Wars have been fought throughout the human history. The concept of war was implemented in order to gain control of lands which is still true to this day.

Many wars have been fought in the recent years that were even devastating. As we humans evolve, our technology grows. After world war II, the UN was created for preventing wars. But UN was not able to do anything. The first major war introduced in the recent times was the Russian-Ukrainian war. The citizens of Ukraine were forced at a large scale. There was a threat and a sense of danger among the people. The next major war is the Israel-Palestine conflict. Many people lost their lives and homes rather than their beliefs.

There is a contrast between the nature of war. They can be anywhere. Other people throughout the world are also affected. Everyday lives in a state of uncertainty. There are tensions between countries all over the world. We have no idea when something devastating might happen. As a student, wars should be fought by taking actions into consideration. Wars should not be fought. Everything doesn't need to be solved with violence. Diplomacy is always an option. Humans are all of the same race and have a very advanced brain. We need to be a step ahead. We must learn to keep peace and harmony between us.

Poem

समानता (नामपद)

अर्थ : समान हुने बाल वा स्थिति

नेपालको कानूनले सबैलाई समानताको अधिकार दिएको छ ।

प्रायोगवाची : बराबर

विपरितार्थी : असमानता

Which 3-letter word completes all four words below? (In place of 'What's the good word?')

P _ _ NT

DE _ _ ST

ST _ _

C _ _ ER

Answer: ARE

के हराइरहेको छ हाम्रो शिक्षण प्रणालीबाट ?

हो साँच्चै ! के हराएजस्तो लाग्छ त? सबै कुरा त ठिकै लाग्छ । तर किन हो किन म आफूलाई कहिँ न कहिँ अधुरो वा बिछडिएको पाउँछु । नभएको भए मेरो समाज, देश आज युवाबाट किन रिक्तो हुँदै जान्छ्यो त ? किन आज यो पिढीमा नैराश्र्यता छाएको छ त ? के यसको लागि म जिम्मेवार छै न? र छु भने मैले कहाँ आफूलाई सुधार गर्नुपर्छ ? आजको यस अनिश्चितताको अवस्थाबाट म स्थिरता कहिले ल्याउन सक्छु? के म साँच्चै बदलिनु पर्छ त? र पर्छ भने एकलै बदलिएर हुन्छ त ?
